

Certifying Renewable Energy

Simon Arnold

The focus for today

As clean energy becomes more important consumers need certification.

But it isn't just fuels

It is where they are used

Our distance to markets &
What our customers think

But it isn't just fuels

It is where they are used

Our distance to markets &

What our customers think

Exporters need certification too

Postscript: but not fuel exports

NZ's Energy Sources PJ

Half our energy is imported fossil fuels

Import substitution will be the priority

Little value in export of renewables

(Besides its hard)
