Mobility Solutions for More Sustainable Cities

Johanna Schelle
Head of Communications & Marketing
Problem

Inefficient

Inconvenient

Unsustainable
Solution

Understand

Optimise

Create
Products

1. Ticketing
2. Analytics

Easy integration
One SDK, several use-cases
No hardware
We automatically detect how, when and why people travel.

- Recording smartphone sensor data
- Process and analyze directly on the phone
- Machine learning
- Third-party data
- Autonomous detection of modes and services
Innovative mobility meets energy transition

Increased attractiveness of public transport

Minimised urban problems

Improved quality of life for citizens
Thank you.
